Rawalpindi, Pakistan

SUMMARY

I am a motivated and detail-oriented Full Stack Developer with 2 months of hands-on experience in building dynamic and scalable web applications using Django, Express.js, React, and Node.js. I have a strong foundation in Computer Science and have recently completed my bachelor's degree from UET Taxila. I'm skilled in full-stack development, RESTful API design, and modern frontend technologies. I'm passionate about writing clean, efficient code and always eager to learn new tools and technologies to deliver high-quality software solutions.

EDUCATION

BSCS Computer Science university of engineering and technology ,Taxila 3.07/4	Nov 2021 - Aug 2025
ICS Computer Science Army public school and collage Jarrar garrison 999/1100	Dec 2019 - Nov 2021
Matric Computer Science Army public school and collage Jarrar Garrison 916/1100	Nov 2017 - Nov 2019

PROFESSIONAL EXPERIENCES

Web Developer(Intern), TIERS Limited Web Developer Intern – Tiers Ltd (Remote) July 2025 – August 2025 - Built and maintained scalable backend systems using Django and Django REST Framework (DRF). - Designed and integrated RESTful APIs to connect front-end applications with backend services. - Worked with relational databases (PostgreSQL/MySQL), implementing models, migrations, and queries. - Implemented authentication, authorization, and session management to enhance application security. - Collaborated with senior developers, debugging issues and optimizing server-side performance. - Used Git and GitHub for version control and collaborative development.	Jul 2025 - Aug 2025
Web Developer(Intern), CodeSoft Web Developer Intern – CodeSoft (Remote) November 2023 – December 2023 - Developed and optimized responsive user interfaces using React.js, HTML, and CSS Modules. - Implemented interactive animations with GSAP to improve user experience and engagement. - Translated Figma design mockups into production-ready components. - Enhanced front-end performance, ensured cross-browser compatibility, and improved accessibility standards. - Collaborated with the development team using Git and GitHub for version control.	Nov 2023 - Dec 2023

TECHNICAL SKILLS

- Programming Languages:** C, C++, JavaScript, Python
- Web Development:** HTML5, CSS3, JavaScript (ES6+), React.js, Django, Node.js
- Database Management:** MySQL, SQL Server
- Version Control:** Git, GitHub

- **UI/UX & Styling:** Tailwind CSS, Bootstrap, Responsive Design
- **Tools & Platforms:** VS Code, Postman, Figma, Netlify, Vercel
- **APIs & JSON:** RESTful API integration, JSON handling
- **Authentication & Security:** Clerk, JWT, basic cryptography concepts
- **Cloud & Deployment:** Render, Railway, GitHub Pages, Firebase basics
- **AI/ML Basics:** Machine Learning fundamentals, Neural Networks (ANN)

ADDITIONAL SKILLS

- Strong problem-solving and analytical skills
- Creative and logical thinking
- Team collaboration and communication
- Decision-making and leadership qualities
- Time management and multitasking
- Quick learner with adaptability to new technologies
- Attention to detail and debugging skills

LANGUAGES

- English
- Urdu
- punjabi

RESEARCH & PROJECTS

Bill Splitter App –Developed a React application that allows users to split bills among friends efficiently. Implemented dynamic input handling, real-time calculations, and conditional rendering to display each person's share. Designed a clean and responsive user interface using React Hooks and CSS.

Travel Packing List App –Created a React application to help users organize and track their packing items before traveling. Features include adding, checking off, and removing items with a clean and interactive UI built using React Hooks and CSS/Tailwind.

Semantic Analysis Website –Developed a web application for sentiment analysis of tweets. Utilized Python for NLP tasks, Flask (HTML) for the interface design, and the Twitter API for real-time tweet retrieval. The app allows users to input keywords, displays sentiment analysis results, and visualizes sentiment trends using interactive charts.

Portfolio Website –Designed and developed a professional portfolio website to showcase my skills, projects, and achievements.Used HTML, CSS, and JavaScript to create a responsive and visually appealing interface. Implemented features such as project galleries, contact forms, and interactive elements to engage visitors and highlight my expertise.

Student Record Management System –Developed a dynamic web-based student management system using Django to simplify academic administration. The system includes modules for managing student records, course enrollments, attendance tracking, and grade management. Designed a user-friendly interface with secure access for administrators, faculty, and students, ensuring efficient data handling and accessibility.

Collaborative Work Platform (CWP) –Developed a real-time team ideation and whiteboard application that enables multiple users to collaborate simultaneously. Built using Next.js and Tailwind CSS for a responsive and modern UI, integrated Liveblocks for real-time synchronization and presence indicators, Convex for backend state management and data storage, and Clerk for secure user authentication and session handling. The platform allows teams to brainstorm ideas, draw, and share visual concepts interactively—similar to Excalidraw—enhancing productivity and creativity in remote teamwork.

CERTIFICATIONS

Introduction To Web Development With HTML, CSS, JavaScript, IBM (Via Coursera)

Apr 2023

Introduction to Web Development with HTML, CSS, JavaScript (IBM – Coursera) Gained hands-on experience in building responsive websites using HTML, CSS, and JavaScript; learned core web development concepts, DOM manipulation, and best practices for creating interactive, user-friendly web applications.

Developing Back-End Apps With Node.js And Express, IBM (Via Coursera)

Aug 2023

Developing Back-End Apps with Node.js and Express (IBM – Coursera) Learned to build and deploy back-end applications using Node.js and Express; gained skills in creating RESTful APIs, handling middleware, managing server-side logic, and connecting applications with databases for dynamic, scalable solutions.

Getting Started With Git And GitHub, IBM (Via Coursera)

Sep 2023

Getting Started with Git and GitHub (IBM – Coursera) Acquired practical skills in version control using Git and GitHub; learned repository management, branching, merging, collaboration workflows, and best practices for maintaining clean and efficient codebases.
